

Fishmeal Sardine & Anchovy

orizon[®]
Smart Nutrition

Scientific name
Strangomera Bentincki
Engraulis Ringens

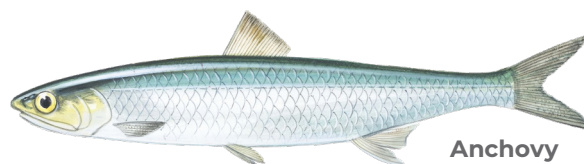

Fishing method
Purse seine

Description

We manage a healthy, sustainable quota in Chile, ensuring a steady supply for our clients year-round. Our fishmeal is made from anchovy and sardine, caught artesanally within the 5-mile limit, ensuring minimal environmental impact and supporting local fishing communities. This artisanal approach creates a positive social impact, empowering fishermen and their families. From the sea to our state-of-the-art processing plant, the catch is transported directly under strict cold-chain protocols, preserving freshness and quality. Carefully processed with advanced technology into high-quality fishmeal, this product meets the best industry standards while promoting sustainability and community development.
