

FishMeal By Product Jack Mackerel & Horse Mackerel

orizon[®]
Smart Nutrition

Scientific name
Trachurus Murphyi
Scomber Japonicus

Fishing method
Purse seine

Description

We manage a growing, sustainable jack mackerel quota (15% annual increase) harvested from the pristine waters of the Humboldt Current - a nutrient-rich, minimally exploited ecosystem that produces superior quality fish. Our unique operation combines industrial vessels and artisanal fishers working collaboratively around & beyond Chile's 5-mile limit, blending traditional fishing knowledge with modern technology. Occasionally, horse mackerel (*Scomber japonicus*) is harvested as natural accompanying fauna, always meeting the same rigorous quality standards as our target species. From catch to processing, we maintain excellence through our rapid cold-chain system and state-of-the-art facilities. Every product - including our fishmeal derived from human-consumption grade raw materials - meets the highest production standards. Our premium fishmeal, used in pet food and animal feed, originates from the same carefully handled catches that supply our human consumption products.

Jack Mackerel
Size: 28-45cm

Horse Mackerel
Size: 26-42cm

Fishing season **FAO 87**

Parameters

Quality	Protein min (%)	TVN max (mg N/100 g)	Histamine max (ppm)	FFA max (% Oleic Acid)
Standard	≥ 62	≤ 120	≤ 1500	≤ 10

PRODUCTS FORM

FIFO = 0

All fish parts (including bycatch) are fully utilized (human consumption + fishmeal) leaving zero waste.
